International Editions

Not authorised for sale in the US, Canada, Australia, New Zealand, Puerto Rico or US Virgin Islands (St. Thomas, St. Croix, St. John)

Notice to Booksellers and Wholesalers

International Editions are produced alongside the equivalent North American titles and are available exclusively outside the US, Canada, Australia, New Zealand, Puerto Rico and US Virgin Islands (St. Thomas, St. Croix, St. John). This restriction benefits customers in regional markets by allowing us to set list prices appropriate to local needs without compromising the quality of the books.

Restrictions have not been placed on the North American Editions, meaning if you still have these in stock, **you can continue to sell them**. However, all new orders will be fulfilled with International Editions. **Customers outside of the US, Canada, Australia, New Zealand, Puerto Rico and US Virgin Islands (St. Thomas, St. Croix, St. John) should direct their orders exclusively to the International Edition ISBNs.**

*International Editions should not be confused with local adaptations where the content is fully revised to meet the needs of the market (e.g., the UK published *Made Incredibly Easy!*[®] series). All locally adapted titles feature in this catalog.

Product Details

We make every effort to ensure that the contents of this catalog are correct at time of publication. However, it is occasionally necessary to make changes to a product's price, bibliographic details and publication date without prior notice. All stock is subject to availability, and all prices, bibliographic details and publication dates are liable to change without prior notice.

The Business of Physical Therapy

1st Edition

Author: **Mark Drnach**

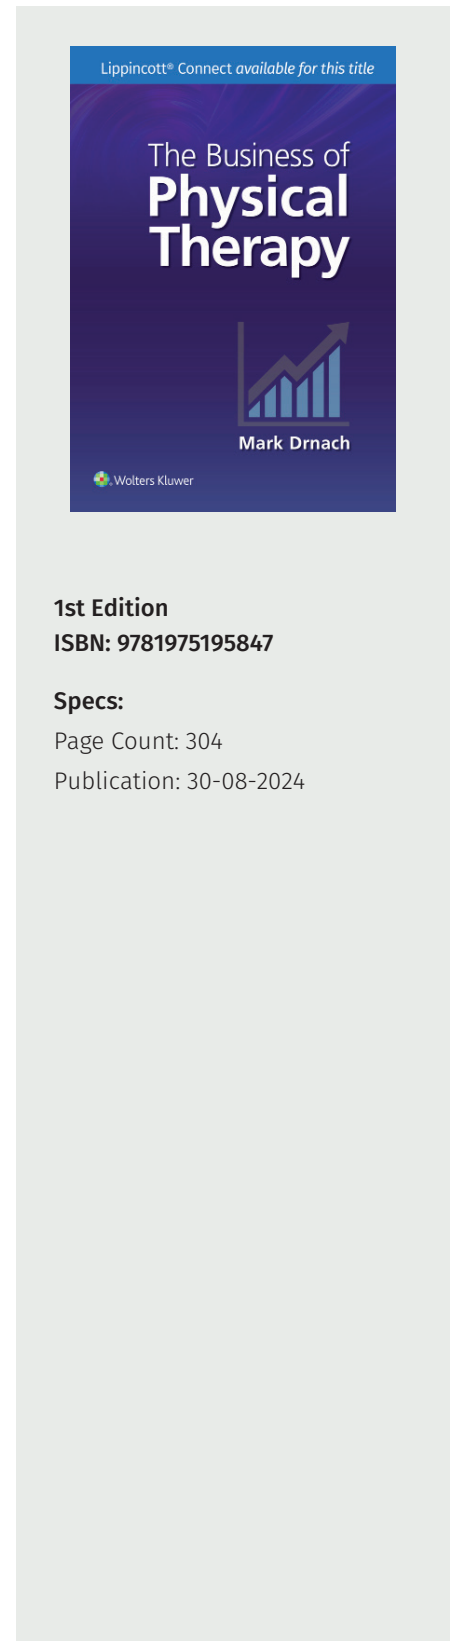

Description

Clinical expertise is paramount in physical therapy, but managing the business side of practice is equally crucial for success. Crafted to meet the specific needs of physical therapy students and professionals, *The Business of Physical Therapy* equips you with the essential non-clinical knowledge and skills to manage the intricate world of business, finance, management, communication, and legal aspects of the physical therapy profession.

This groundbreaking resource is the first and only text that covers the entire spectrum of non-clinical topics at the required depth. From mastering financial management and optimizing operational efficiency to honing leadership and communication abilities and ensuring legal compliance, this pioneering guide empowers you to thrive in today's competitive healthcare landscape.

Features

- Comprehensive non-clinical coverage familiarizes students with the full spectrum of professional issues—including business, financial, professional, and legal considerations—in a single resource.
- Built-in learning resources reinforce essential concepts and practices through chapter quizzes, video tutorials, and links to additional information.

Manual of Airway Management in Critical Care: Print + eBook with Multimedia

1st Edition

Author: Jarrod M. Mosier, Calvin A. Brown III, Matteo Parotto, Raquel R. Bartz

Description

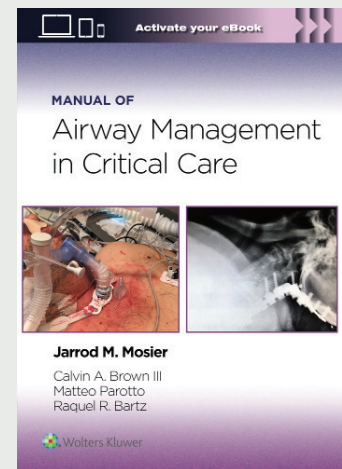

Patterned after the renowned Walls Manual of Emergency Airway Management, *Manual of Airway Management in Critical Care* is a concise, focused reference on this challenging topic specifically for ICU providers. Drs. Jarrod M. Mosier, Calvin A. Brown III, Matteo Parotto, and Raquel R. Bartz bring their extensive expertise in critical care airway management to this all-new volume, as well as Dr. Mosier's experience as director of the nationally recognized The Difficult Airway Course: Critical Care™. An excellent resource for intensivists, advanced practice providers, critical care nurses, and respiratory therapists, this first-of-its-kind text reflects ICU airway management from cover to cover: its unique standards of care, its unique risks, and its unique body of literature that set it apart from other medical disciplines.

Features

- Uses a hands-on approach to provide the concrete guidance needed to effectively manage both adult and pediatric airway emergencies in the ICU
- Emphasizes practicality with step-by-step instructions, mnemonics, easy-to-follow algorithms, and rich illustrations
- Covers key topics such as transitions between the intubated to spontaneously breathing states (both intubation and extubation), noninvasive respiratory support strategies for preoxygenation, examples of pulmonary pathologies which affect the decision to intubate or extubate, advanced hemodynamic assessment and management, and patient positioning and related airway strategies.
- Includes over 20 videos that demonstrate case examples and various procedures

4th Edition

Author: **Marin H. Kollef, Vladimir N. Despotovic, Bryan D. Kraft, Rachel K. McDonald, Nguyet Nguyen**

Description

Part of the popular Washington Manual® handbook series, *The Washington Manual of Critical Care* provides concise, high-yield content that reflects today's fast-changing advances in the field. Edited by Drs. Marin H. Kollef, Vladimir N. Despotovic, Bryan D. Kraft, Rachel K. McDonald, and Nguyet Nguyen, and written by teams of Washington University residents and faculty, the fourth edition focuses on the essential information you need to know, using a brief, bulleted format, along with numerous figures, tables, algorithms, and images throughout. In one convenient, portable resource, you'll find complete coverage of bedside diagnosis and management of the most frequently encountered illnesses and problems seen in the ICU—all at your fingertips for quick review and reference.

Features

- Covers the treatment and management of shock, sepsis, acute episodes of COPD and asthma, myocardial infarctions, organ failure, and other conditions and disorders
- Provides quick-reference overviews of intubation and catheterization procedures, as well as of common drug side effects and drug-drug interactions
- Includes new chapters on Emergency Department as the Gateway to the ICU, Post-Cardiac Arrest Management, High Altitude Illness, COVID-19 and Other Viral Pneumonias, Informatics in the Intensive Care Unit, and more, as well as thorough updates throughout
- Features a wealth of comprehensive, up-to-date tables and algorithms that help guide efficient decision-making
- Shares the experience and knowledge of Washington University faculty physicians and experts in their fields from the Departments of Medicine, Neurology, Surgery, Obstetrics and Gynecology, and Anesthesiology
- An ideal reference to meet the daily needs of practicing intensivists, residents, fellows, and critical care nurses

Dermatology in Pediatrics

1st Edition

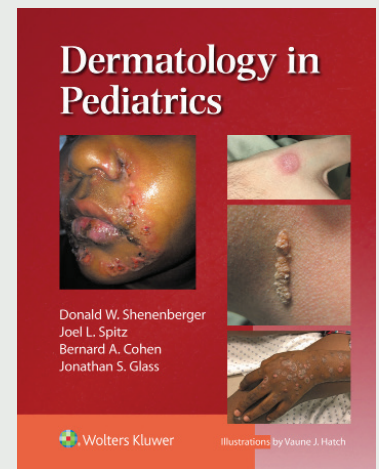

Author: Donald W. Shenенberger, Joel L. Spitz, Bernard A. Cohen, Jonathan S. Glass

Description

Highly illustrated and easy to use, *Dermatology in Pediatrics*, by Drs. Donald Shenенberger, Bernard Cohen, Jonathan Glass, and Joel Spitz, is a practical, everyday reference not only for dermatologists and dermatology residents, but also for pediatricians, family medicine physicians, and other clinicians who care for children. For each dermatologic condition, you'll find a two-page spread: on the left is concise, templated information on diagnosis and management; on the right are full-color illustrations and clinical photographs that provide real-world visual guidance. From cover to cover, an easy-to-navigate, open, and visually appealing layout speeds you to the information you need.

Features

- Covers more than 130 different dermatologic conditions commonly seen in the pediatric population, arranged by location and/or description rather than by diagnosis
- Includes 55 conditions associated with the neonate contained in a separate section
- Features 300 full-color illustrations and clinical photographs throughout
- Breaks each topic down into easy-to-digest sections for quick reference: Pathogenesis, Key Features, Differential Diagnosis, Lab Data, Management, Prognosis, and Pearls
- Contains a unique "What Parents Ask" feature for each disease, as well as supporting resources and references you can share with parents

Molecular Biology of SARS-CoV-2

1st Edition

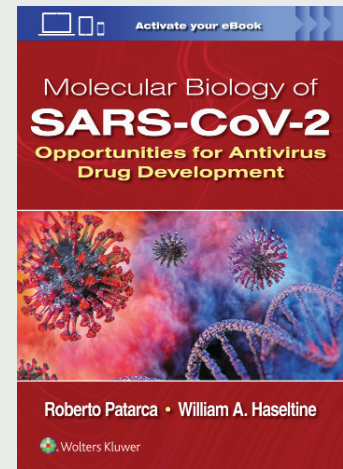

Author: Roberto Patarca, William, A. Haseltine

Description

Offering a thorough, accessible overview of the basic science and clinical data regarding the virus that causes COVID-19, *Molecular Biology of SARS-CoV-2* is an excellent resource for researchers, clinical scientists, physicians, and students. This volume offers in-depth, extended content that originated with Drs. Roberto Patarca's and William A. Haseltine's chapter in *The COVID-19 Textbook*, edited by Dr. Haseltine and Dr. Patarca. The greatly expanded material in this text provides a much-needed primer in this complex area.

Features

- Reviews the basic science, clinical data and various perspectives on how SARS-CoV-2 infects cells, replicates, manipulates cellular machinery, evades host defenses, and is transmitted to other hosts
- Covers the origin and structure of SARS-CoV-2, followed by chapters based on the life cycle of the virus
- Provides a thorough review of what is known for each molecular component of the viral life cycle while incorporating information on pertinent prevention and therapeutic interventions

ACSM's Nutrition for Exercise Science (American College of Sports Medicine)

2nd Edition

Author: **Dan Benardot**

Description

An invaluable resource for both exercise science majors and non-majors, *ACSM's Nutrition for Exercise Science*, 2nd Edition, demystifies the relationship between nutrition and exercise science and prepares you to confidently apply concepts to clinical practice.

Drawing on author Dan Benardot's extensive experience as an instructor, scientist, this engaging, authoritative text delivers an evidence-based yet accessible exploration of how nutrition impacts various aspects of active populations, from general health to muscle development, exercise recovery, injury prevention, and psychological well-being. Real-world examples and case studies bring difficult concepts to life, equipping you with the knowledge and confidence to support the nutritional needs of active populations throughout your healthcare career.

Features

- NEW! Comparative Case Studies at the end of each chapter challenge students to apply what they've learned to varying active populations from endurance athletes to power-training athletes to team sports participants.
- Practical Application Activity boxes provide engaging practice assessing diets, analyzing energy balances, and other professional tasks.
- Chapter-opening Case Studies with discussion questions foster the critical thinking skills essential to real-world application.
- Important Factors to Consider boxes throughout chapters reinforce critical chapter points.

Nursing Leaders Driving Health Equity (NLN)

1st Edition

Author: Sandra Davis, PhD, DPM, ACNP-BC, FAANP, Andrea Lindell, PhD, RN, ANEF

Description

Gaps in healthcare delivery and health outcomes are wide, persistent, and increasing in communities throughout the United States—especially among historically underrepresented and excluded groups. Addressing the systemic challenges of structural racism, political conflict, social unrest, and climate change requires interdisciplinary collaboration and consideration of the social and structural determinants of health (SSDH).

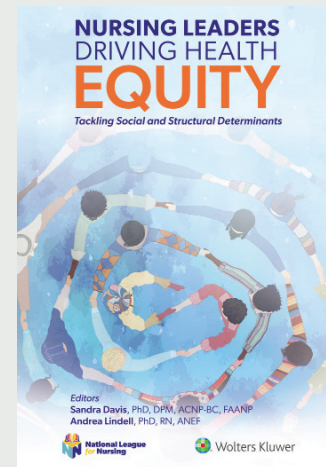

Nursing Leaders Driving Health Equity: Tackling Social and Structural Determinants is the first comprehensive guide to integrate SSDH into nursing and interdisciplinary programs, curricula, and practice to combat the complex factors impacting health equity. Case studies and practical advice from experienced nursing educators, administrators, and practitioners provide a framework for the development, integration, discussion, and assessment of SSDH in teaching, learning, and practice environments.

“This comprehensive and thoughtful book provides valuable resources for educators, administrators, and practitioners within the healthcare professions and beyond, and offers opportunities to employ a continuous systematic evaluation to advance the work of social justice.”

- Patricia A. Sharpnack, DNP, RN, CNE, NEA-BC, ANEF, FAANP
Chair, National League for Nursing
Dean and Strawbridge Professor
Ursuline College, Breen School of Nursing and Health Professions
Pepper Pike, Ohio”

Features

- Design effective educational strategies integrating SSDH into existing curricula and prepare students to address the social challenges impacting their patients’ health outcomes.
- Develop holistic and sustainable infrastructures, policies, and workflows focusing on identification of patients who need referrals for intervention and evaluation for outcomes related to SSDH.
- Apply research and evidence-based practice related to SSDH to help identify patients with unmet needs and refer them to community resources and support services.
- Implement guidelines that support the integration of SSDH into healthcare practice.
