International Editions

Not authorised for sale in the US, Canada, Australia, New Zealand, Puerto Rico, or US Virgin Islands (St. Thomas, St. Croix, St. John)

Notice to Booksellers and Wholesalers

International Editions are produced alongside the equivalent North American titles and are available exclusively outside the US, Canada, Australia, New Zealand, Puerto Rico, and US Virgin Islands (St. Thomas, St. Croix, St. John). This restriction benefits customers in regional markets by allowing us to set list prices appropriate to local needs without compromising the quality of the books.

Restrictions have not been placed on the North American Editions, meaning if you still have these in stock, **you can continue to sell them**. However, all new orders will be fulfilled with International Editions. **Customers outside of the US, Canada, Australia, New Zealand, Puerto Rico, and US Virgin Islands (St. Thomas, St. Croix, St. John) should direct their orders exclusively to the International Edition ISBNs.**

*International Editions should not be confused with local adaptations where the content is fully revised to meet the needs of the market (e.g., the UK published *Made Incredibly Easy!*[®] series). All locally adapted titles feature in this catalog.

Product Details

We make every effort to ensure that the contents of this catalog are correct at time of publication. However, it is occasionally necessary to make changes to a product's price, bibliographic details, and publication date without prior notice. All stock is subject to availability, and all prices, bibliographic details, and publication dates are liable to change without prior notice.

Bonica's Management of Pain

6th Edition

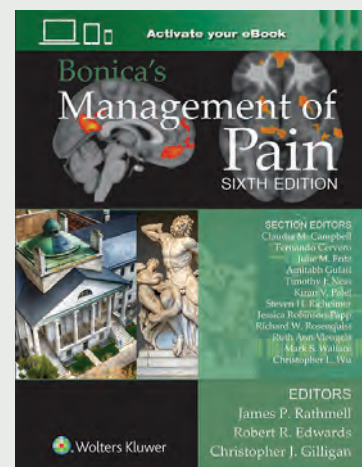

Author: **James P. Rathmell, Robert R. Edwards, Christopher J. Gilligan**

Description

Providing comprehensive, well-illustrated coverage of both the scientific underpinnings of pain and up-to-date clinical management, **Bonica's Management of Pain** has been the gold standard resource in the field for more than 70 years. Edited by Drs. James P. Rathmell, Robert R. Edwards, and Christopher J. Gilligan, along with an expert team of section editors, this fully revised reference addresses the full range of pain conditions — including neuropathic pain, pain due to cancer, and acute pain situations — for both adults and children. An international group of contributors from every area of pain medicine and research provides current, clinically oriented coverage of the entire field in a reader-friendly format.

Features

- Focuses on **state-of-the art pain science and pain management**, all substantially updated with theoretical advancements and contemporary therapies that have emerged since the previous edition
- Addresses the evolving evidence base, controversies, and clinical realities surrounding **opioid therapy**, as well as **global disparities** in diagnosis, treatment, and availability of essential analgesic medications
- Reflects **recent advances** in neuromodulation, interventional therapies, psychological treatments, and multimodal rehabilitation
- Discusses the **economic, political, legal, ethical**, and sociological considerations of pain; evaluation of the pain patient; pain conditions; methods for symptomatic control; and provision of pain treatment
- Shares the **knowledge and expertise of global experts** who are leaders in the fields of basic science, clinical medicine (including anesthesiology, neurology, physical medicine and rehabilitation, palliative care, and more), psychology, surgery, pharmacology, ethics, health policy, and implementation science
- Continues the **tradition of excellence started by Dr. John Bonica**, founder of the field of pain management after World War II, the first multidisciplinary pain clinic in academic medical history, and the International Association for the Study of Pain (IASP)

The Future of Nursing Education

1st Edition

Author: **Gordan Lee Gillespie, Sandra Davis, Beverly Malone**

Description

The Future of Nursing Education: An International Utstein Report, provides the results of the NLN Utstein meeting in June 2025 in Helsinki, Finland. The purpose of the meeting was to identify the future priorities of nursing education as well as discuss current and future barriers and strategies to promote use of competency-based education, artificial intelligence, planetary health, and nurse well-being constructs into nursing education curricula. It also covered the challenges and strategies to address the global nurse educator shortage.

The Future of Nursing Education offers guidance and practical strategies on a global scale for issues that impact nurse educators today and that will affect the next generation of nurse educators. As faculty are trying to address these issues in isolation, the book provides a synthesis for ways to tackle these priorities in a variety of cultural contexts striving to identify unification of strategies that can be applied anywhere.

No other single resource addresses these priority topics in a single book, and no other resource focuses on nurse educators and nursing education. It provides not only the report of this international Utstein meeting, but includes specific strategies that can be translated to the practice of nursing education, in the US as well as internationally.

Features

- Full Report on the results of the Ustein meeting
- Strategies that can be used by Nurse Educators to meet the many challenges in nursing and nursing education

Rosdahl's Textbook of Basic Nursing, North American Edition

13th Edition

Author: **Diana Rupert, Deanna Wolfskeil**

Description

Led by Diane Rupert, PhD, RN, CNE, a respected nurse educator and NCLEX® expert, the **13th Edition** of *Rosdahl's Textbook of Basic Nursing* brings a fresh, forward-looking perspective to a trusted name in LPN/LVN education. Rupert builds on the longstanding Rosdahl legacy to deliver a more focused, clinically relevant resource for today's students and faculty.

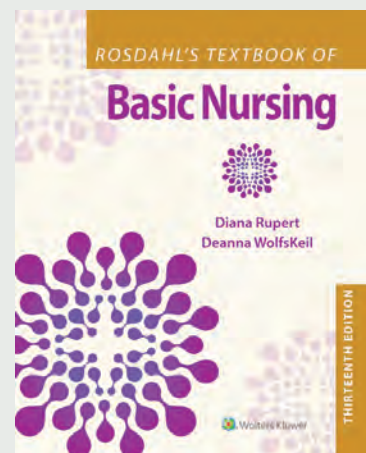

For more than 50 years, Rosdahl's Textbook of Basic Nursing has prepared students for safe practice and NCLEX-PN success. This edition continues that tradition while enhancing clarity, usability, and alignment with current practice. Designed as a comprehensive, all-in-one solution, it supports the full LPN curriculum with short, approachable chapters, engaging visuals, and integrated learning tools that reinforce understanding and retention.

Under Rupert's leadership, this edition strengthens clinical judgment and NCLEX readiness through integration of the Clinical Judgment Measurement Model and a newly added, 2026-aligned NCLEX-PN practice exam designed to mirror the testing experience. Together, these enhancements help students apply knowledge, think critically, and graduate practice-ready for today's healthcare environments.

Features

- **NEW:** 2026-aligned NCLEX-PN practice exam case studies and Next Gen-style items simulate the testing experience and strengthen readiness.
- **UPDATED:** Enhanced women's health and maternity content with updated screening procedures reflects current standards of practice and evolving patient care.
- **NEW:** Clinical Judgment Measurement Model (CJMM) integration strengthens clinical reasoning and aligns learning to NCLEX expectations.
- **NEW:** Updated screening procedures ensure alignment with evolving clinical protocols and patient care expectations.
- **UPDATED:** Content across chapters reflects current nursing standards, guidelines, and best practices.
- All-in-one curriculum coverage across the LPN program supports consistent instruction and program efficiency with a single resource.
- Updated art and illustrations reflect current practice and diversity in nursing.
- Nursing Alerts and Special Considerations highlight key actions, safety, and patient-centered care.
- Short, focused chapters with clear structure make complex content easier to teach, learn, and retain.
- Integrated NCLEX-style questions, Alerts, and synthesis activities reinforce application and connect content directly to exam expectations.
